## Experience

- 1997-today     **President and Managing Member, Cailor & Associates, LLC**, Atlanta, GA  
Organized in November 1997 to provide a diverse array of structural engineering and consulting services to clients including owners, developers, architects, contractors and professional engineers. Structural analysis and design of high, mid and low-rise buildings for the effects of gravity, earth, wind and seismic loads. Personally designed over 320 projects with over 30 million square feet of elevated structure plus 5 million square feet of slab-on-grade throughout career.
- 1989-1997     **Vice President/Engineering, CCS, Inc.**, Atlanta, GA  
CCS was a specialty contractor and specialty engineering firm. Duties included the structural analysis and design of high, mid and low-rise buildings of post-tensioned concrete for the effects of gravity, earth, wind and seismic loads. Direct management and development of engineering, drafting, estimating and administrative personnel. Responsible for relations, correspondence and coordination with developers, owners, architects, engineers, contractors and corporate personnel.
- 1986-1989     **Project Engineer, John Portman & Associates**, Atlanta, GA  
JP&A was an international architectural and engineering firm which is part of the Portman family of companies. Duties included the structural analysis and design of high, mid and low-rise buildings of structural steel and reinforced concrete for the effects of gravity, earth, wind and seismic loads.
- 1985-1985     **Staff Engineer, J.N. Cernica & Associates**, Youngstown, OH  
Inspection and forensic repair recommendations for structures damaged by a major F5 tornado.
- 1984-1984     **Civil Engineer Intern, Pennsylvania Department of Transportation**, Franklin, PA  
Inspected operations in bridge construction and highway rehabilitation.
